### Description

When trying to add a new page to an existing structure I got the following error:

Field 'structure\_id' doesn't have a default value

I could correct this very simply by going into the MySQL administrator and changing that column to have a default value of 0. I guess this is just that the DB set up SQL is incorrect and needs to have default value added to that column. I used the update SQL from 1.8 to 1.9 to create this tikiwiki so I guess that is the SQL that would need to be changed. I have not tested the new clean DB install of 1.9.

Cheers Mike

### Solution

---

Xavi (Jan 15th, 2009):

- Works for me.
- Please retest on current stable branch 2.x.
- Thanks in advanced for reporting it.

---

Beestje(Apr 21st, 2009)

- Works for me on 1.9.11
- Works for me on 2.2 and 2.1

I have not tested the new clean DB install of 1.9-1.10,the same problem occur

Dormy 05 Apr 08 14:51 GMT-0000

Hi.

I also got this problem when running the 1.9.10.1 release. I did have a look at the code in structlib.php and to me the problem seemed to be that any new structure\_id was not used when doing inserts into the tiki\_structures table. I did the following modifications to the rows 204 and 205 to make it work:

```
204: $query = "insert into `tiki_structures`(`structure_id`,`parent_id`,`page_id`,`page_alias`,`pos`)
values(?,?,?,?,?)";
```

```
205: $result = $this->query($query,array(int)$created,(int)$parent_id,(int)$page_id,$alias,(int)$max;
```

These changes seems to work for me.

/Dormy

Beestje 21 Apr 09 10:33 GMT-0000

I am able to add a new page to an existing structure.

Closing Bug.
