Description

Hi,

When I use contact us feature, mail address shows as webmaster(AT)kic(DOT)mine(DOT)nu
Then click send mail, it shows AT DOT DOT <webmasterkicminenu>

I use tikiwiki-1.9.7 on OpenSUSE-10.1, UTF-8 character code.

Please advice or give me a hint.

Thanks,
Shigerusz3

Things have really evaluated since Tiki 1.9 and openSuse10.1.

We don't use contact-us the same and as far as I have tested any email address added in a wiki page will be "protected". (still it is advised generally to use a form)

Please retest with updated version of your software and OS and create a new ticket if you still have an issue.
