Description

I made a tracker and get one of the user's group the permission to view this tracker only (by making local permissions only for that tracker).

So users of that group can view that tracker's items but when clicking to download one of the attachments, they only see a blank page.

Solution

koth: it is actually not as simple as below - need to take into account situation of view_pending and view_closed perms. Even with latest fix, still might not work with user/group trackers.

I saw the code of download_item_attachment.php and realized that only global permission are being checked, so I made some changes just after calling
include_once ('lib/trackers/trackerlib.php');

changes are:
adding:

```
$query = "SELECT `trackerId` FROM `tiki_tracker_items` WHERE `itemId`=(SELECT `itemId`  
FROM `tiki_tracker_item_attachments` WHERE `attId`=? LIMIT 1)";  
$trackerId = $dbTiki->getOne($query,$_REQUESTattId);
```

and changing:

```
if ($tiki_p_view_trackers != 'y') {  
die;  
}
```

to:

```
if ($tiki_p_view_trackers != 'y' && !($userlib->object_has_permission($user, $trackerId, 'tracker',  
'tiki_p_view_trackers')) ) {  
die;  
}
```
