Bernard Sfez / Tiki Specialist 19 Oct 21 11:41 GMT-0000

As per Tiki23 (Tested a lot around Tiki18 - Tiki19) you can have multilingual forums including RTL and LTR. The functionalities are here it is more the interface and the strategy that is that requires attention.

For the strategy every one will have its own (mixed, separated, etc) and for the interface or display It is possible to create sections and use modules per languages or even create an interface using the plugin list before getting into the topic.

Please retest and report specific issues in a new ticket if needed.
