Description

The list of tiki pages presented for selection and addition to a structure is truncated at 50 records for no apparent reason and there's no way to add records >50 without running a filter.

I just parroted what I saw in tiki-admin_categories.php for its similar page list and it works.

The diff is below - hope I did that correctly.

- .backup is the original file from the official tiki releast. *.php is the version I modified.

Solution

```
diff tiki-edit_structure.php tiki-edit_structure.php.backup
130c130
< $listpages = $tikilib->list_pages(0, -1, 'pageName_asc', $find_objects);
```

```
> $listpages = $tikilib->list_pages(0, 50, 'pageName_asc', $find_objects);
```
