Description

I'd like to have a way to comment on an item from GET by replying to it.

For example, right now an email with the subject:

GET:BigIdea

will send the user the BigIdea page.

A reply with the subject:

RE:GET:BigIdea

would generates a comment on the BigIdea page.

This use is different from appending or prepending. It's meant for a note in the margin not a modification of the original text.
