Description

So we know which admin created a login...

We currently have a log entry when a user is assigned to a group, but not when he is unassigned.

Also, we have:

unassigned perm tiki_p_broadcast from group admin

but not:

assigned perm tiki_p_broadcast from group admin

Maybe adding failed login attempts would be good too...

Is this still an issue? If so please update the version on the ticket.

Bernard Sfez / Tiki Specialist 20 Oct 21 11:14 GMT-0000

As per Tiki23 creation and deletion is not logged in Tiki (Tiki logs and Action logs).
It is important such action are monitored.

Additional thinking: Eventually the data could be searchable to be included in a plugin
List or ListExecute.
