Description

Use this URL: <http://www.flylac.org/tiki-galleries.php>

Then hover the mouse over any of the galleries, the galleryId property is not set, this is an example shortcut:

http://www.flylac.org/tiki-browse_gallery.php?galleryId=

The galleryId is missing: ...browse_gallery.php?galleryId=

Solution

works for me...

I have only just noticed, but I have been getting this problem after upgrade to 1.9.7. Quite annoying and dont want it propagated into the 1.9.8 release!! Looking at the database, I cant figure out entirely where the gallery listing is coming from because its giving a complete list of galleries even though the corresponding table doesnt list them all!

Check it out:
<http://andrews-adventures.com/home/tiki-galleries.php>

None of the gallery IDs are there... mail me for more info!

I just found a fix for this problem.

You must disable the galleries feature and then re-enable it. Suddenly, you get all your gallery id's back.

Until then, a user clicking on any gallery will be able to view ALL of your galleries as 1 gallery, whether those images belonged to a private gallery or not - a security defect if ever I saw one ;)
