Description

This was also reproduced on the http://demo.opensourcecms.com site.
When you select only two langages: english and french in the admin i18n section, on the line: Reg users can change language, you check the box named "Available languages" and you select english and french.

Then, when you go on a wiki page and click on the "translation" button, you see only english and french in the drop-down list. This is fine.
But when you edit a wiki page, the drop-down list of languages you can set for the page has all languages instean of only the expected two.

Solution

This has been solved in BRANCH-1-9 and will be in 1.9.8
