Description

The problem: Say I am multi-tasking.

1- I start editing a wiki page

2- I check my thunderbird email.

3- I click a link in my email

4- That link could take over my browser and I lose what I was editing. Not fun.

This is what we need:

http://marclaporte.com/tiki/FeatureRequest_BetterHandlingOfBackButtonWhileEditing.swf.html

And that solution also works when you are clicking a link in an email. (not just back button)

other causes of lost edit are listed in documentation.

similar: http://dev.tikiwiki.org/tiki-view_tracker_item.php?itemId=971

Solution

works well in 1.9.8.3 +

in 1.10, it works well in latest versions of SVN.
