Wiki page attachments: better error message on failure

Status

 Pending

Subject

Wiki page attachments: better error message on failure

Version

1.9.x

2.x

Category

- Usability

Feature

Wiki (page view, edit, history, rename, etc)

File Gallery (elFinder or standard UI)

Submitted by

Marc Laporte

Rating

★★★★★ (0) 

Description

If an upload fails here: `tiki-list_file_gallery.php?galleryId=1`, I get a descriptive error message (ex: file too big).

The same would be useful for wiki page attachments.

It would be helpful to know that the upload failed because a directory doesn't exist or that permissions are not valid. That's especially true when setting up a new wiki.
