Description

For example, on a wiki page like:

tiki-index.php?page.php?page=genericwikitemplatepage&itemId=50

I could see the values of various tracker fields for itemId 50. Ideally, I could use various wiki formatting for this data.

```
✘
Here is field #417 for trackeritemid #50
{TRACKERITEM(field=>417)}{TRACKERITEM}

__Here is field #460 for trackeritemid #50__
{TRACKERITEM(field=>460)}{TRACKERITEM}

^
Here is field #72 for trackeritemid #50__
{TRACKERITEM(field=>72)}{TRACKERITEM}
^
```
