

Find [___] [go]

No pages matched the search criteria

Page: 1/0

And it should show the tracker item containing that word.

Confirmed that the same behavior is happening in 1.10cvs (from July 24th). Checked at:
<http://moviments.net/intercanvis/tracker2>

Adding a new item with the word "senzilles". If I search that word under the tiki search_new module, I can't find it. If I search through Trackers interface directly, I do find it.

Update2: using Module search_box I can find it! (real time indexation works then)

Fixed on 1.10cvs. Not sure on 1.9cvs (I couldn't check with latest code). As far as I'm concerned, I leave this bug ask closed. (reopen if you test on 1.9.cvs and it fails)

Solution

drop down box fixed in 1.9 cvs

try to reduce the search indexation rate for site with not a lot of access
