Description

Using 1.10cvs from mid June 2007

I'm using this code in here:

<http://www.moviments.net/intercanvis/Ofertes>

```
!! 1.1. Oferiments de __Cursos__ {TRACKERLIST(trackerId=>2,fields=>9:12:20:11:19,
showtitle=>n, showlinks=>y, showdesc=>n, showinitials=>y, showstatus=>y, status=>opc,
max=>20, filterfield=>42, filtervalue=>, exactvalue=>6,
golIfOne=>n)}Com????{TRACKERLIST} !! 1.2. Oferiments d'__Habitatge__
{TRACKERLIST(trackerId=>2,fields=>9:12:20:11:19, showtitle=>n, showlinks=>y,
showdesc=>n, showinitials=>y, showstatus=>y, status=>opc, max=>20, filterfield=>42,
filtervalue=>45, exactvalue=>45, golIfOne=>n)}Com????{TRACKERLIST}
```

In the three cases cases I get
"incorrect filterfield"

Which I don't know why, since i follow indications at:

<http://doc.tikiwiki.org/PluginTrackerList>

I've tried with many more variants, just in case, with the same result (incorrect filterfield):

```
{TRACKERLIST(trackerId=>2,fields=>9:12:20:11:19, showtitle=>n, showlinks=>y,
showdesc=>n, showinitials=>y, showstatus=>y, status=>opc, max=>20, filterfield=>42,
filtervalue=>6, exactvalue=>6, golfOne=>n)}Com????{TRACKERLIST}
{TRACKERLIST(trackerId=>2,fields=>9:12:20:11:19, showtitle=>n, showlinks=>y,
showdesc=>n, showinitials=>y, showstatus=>y, status=>opc, max=>20, filterfield=>42,
filtervalue=>6, exactvalue=>, golfOne=>n)}Com????{TRACKERLIST}
{TRACKERLIST(trackerId=>2,fields=>9:12:20:11:19, showtitle=>n, showlinks=>y,
showdesc=>n, showinitials=>y, showstatus=>y, status=>opc, max=>20, filterfield=>42,
filtervalue=>*, exactvalue=>6, golfOne=>n)}Com????{TRACKERLIST}
```

In this tracker, field 42 is a category (id2), which has some more subcategories inside:
http://www.moviments.net/intercanvis/tiki-admin_categories.php?parentId=2

Categ 6 and categ 45 are subcategories of it.

Tracker 2, has many fields, but 2 examples for the "incorrect filterfield" behavior are:

Id		posit	name	type	options	isMain	Multil.	Tbl	vis
Search.	Public	Hidden	Mandat.	Desc.					
11	edit	30	Cursos	category	6	n	n	n	
y	y	n	n						
16	edit	35	Habitatge	category	45	n	n	n	
y	y	n	n						

However, if I don't set any filterfield nor exact value, then I can list all items without problem.(but no pre-filtering). Example:

```
{TRACKERLIST(trackerId=>2,fields=>9:42:12:20:19, showtitle=>n, showlinks=>y,
showdesc=>n, showinitials=>y, showstatus=>y, status=>opc, max=>20, filterfield=>42,
filtervalue=>, exactvalue=>, golfOne=>n)}Com????{TRACKERLIST}
```

Some bug around filterfield param when using categories?
