Description

With MediaWiki, before you save, you can review changes. It shows what you will change (if you click save), in wiki diff format.

This is very nice.

Sometimes, we have done several edits, and we are not sure exactly what we changed (supposing we are multitasking or interrupted). It is nice to be able to review this and fill out the edit description accordingly

Useful for translation as well:

http://wiki-translation.com/tiki-view_tracker_item.php?itemId=51

Related:

- Support some of the MediaWiki syntax that doesn't conflict with TikiWiki syntax
- Infoboxes like MediaWiki/Wikipedia, but not just using trackers
- MediaWiki import script

Solution

Done!
