Description

Various *.tikiwiki.org sites are managed by different volunteers on various hosts. That is good.

Each domain should be systematically copied over to someone else.

Something like:

| domain | managed by | backed up by |
|---------------------|-------------|--------------|
| fr.tikiwiki.org | mose | marclaporte |
| themes.tikiwiki.org | marclaporte | luci |

Solution

We'll do this with TRIM

Workaround

This request has been superceded by the community backup server which will be receiving backups

very shortly from all the Tiki 12 sites.
