Rating

Description
fields defined varchar(256) fail on MySQL 4.0
db/tiki.sql lines 4868 and 4877

the last two tables added: tiki_webmail_contacts_ext and tiki_webmail_contacts_fields

I would fix it if i had check-in powers sorted out (working on it) but i'm not sure that wouldn't it break anything else (in webmail?)

Solution
use varchar(255) -

Importance
7
