### Related-to

- Login; Remember me is not working when it is set to "Always"

### Description

The "Remember me" feature of login on tw.o sites doesn't really work as it should. On tw.o, dev.tw.o and themes.tw.o it's set via Admin > Login to values "tikiwiki, .tikiwiki.org, /, 1 week" and it lasts only some hour or so and expires then. It's annoying to relogin many times a day.

remember me haven't worked either on many other sites... (it seems as if when other users log in the same site, tikiwiki expires your session???? or something like that...)

Connor MacLeod of the Clan MacLeod 05 Feb 08 19:38 GMT-0000

We've experienced the same issue with "remember me", and the admin controls for session lifetime. "Rm" seems to work only until the session expires, and we haven't been successful in extending the session from the admin pages.

luciash d' being ☐ 16 Apr 08 10:34 GMT-0000

it's just a wild guess but i changed on doc.tw.o the remember me name to "doctwo" and domain to ".doc.tikiwiki.org" and it keeps me logged in for several days already...

Xavier de Pedro 19 Aug 08 10:15 GMT-0000

Hi luci:

This works for me. Can you retest?

Beestje 20 Apr 09 14:51 GMT-0000

Tested locally on 2.1 and 2.2. and on \*.tw.o.

Remember me works on \*.tw.o

locally, it didn't work untill I set the session lifetime in php.ini :

```
session.cookie_lifetime = xxxxxx
```

```
session.gc_maxlifetime = xxx
```
