## Description
i want to share files between groups of users, some can upload, some only download, others administrate (create and manage file galleries).
my problem is that the administrator users cannot easily assign permissions to the file galleries:
via a dedicated group i assigned tiki_p_admin_file_galleries and tiki_p_admin_objects to those users, but the key symbol to assign permissions to file gallery objects does not appear for those users. they can, however, use the link tiki-objectpermissions.php manually.

does the feature to show the objectpermissions depend on any other flags/permissions?
i could not find any hint in the documentation so far..

## Solution
in the meantime i have a fix which works for me:

in the file templates/tiki-file_galleries.tpl revision 1.26.2.19, i changed line 202 from
{if $tiki_p_admin eq 'y'}
to
{if $tiki_p_admin eq 'y' or $tiki_p_admin_file_galleries eq 'y'}

any comments? i am new to tikiwiki, maybe there are design guidelines to restrict changing permissions to admins
(i.e, users who have tiki_p_admin)?
