### Description

server: Apache 2.2.4

`./configure prefix=/usr/local/apache2 enable-mods-shared=most`

php 5.2.3

`./configure prefix=/usr/local/php with-apxs2=/usr/local/apache2/bin/apxs with-mysql=/usr/local/mysql with-mysqli=/usr/local/mysql/bin/mysql_config enable-force-cgi-redirect with-zlib --with-expat-dir=/usr/local/expat`

MySQL 5.0.45

`./configure prefix=/usr/local/mysql localstatedir=/usr/local/mysql/data disable-maintainer-mode with-mysqld-user=mysql --enable-large-files-without-debug`

in php writes that xml is enabled...

short tags are enabled too in php.ini

when i go to `http://myhost/tikiwiki/tiki-install.php` version: 1.9.7

it asks to make writeable dirs, so i make...

i get:

Tiki installer v1.9

default

reload

Please enter your database connection info

Database type:

MySQL

The type of database you intend to use

Host:

localhost

Hostname or IP for your MySQL database, example: localhost if running in the same machine as tiki  
 If you use SQLite, insert the path and filename to your database file

User:

Database user

Password:

Database password

Database name:

The name of the database where tiki will create tables. You can create the database using mysqladmin, or PHPMyAdmin or ask your hosting service to create a MySQL database. Normally Tiki tables won't conflict with other product names.  
 If you use Oracle, you can put your TNS Name here and leave hostname empty or you override tnsnames.ora and put your SID here and fill your hostname:port above.

Submit Query

then it asks me to enter username and pass and db name of MySQL  
 i enter username and pass and db  
 and it shows me the same but with bonus message:

Access denied for user 'wiki'@'localhost' (using password: YES)

with the same username and pass i can connect over phpmyadmin...

ricks99

User was missing the db/local.php file. Without it, the installer could not contact the database.

what its source?

HELP!

Solution

ricks99

```
<?php
$db_tiki='mysql';
$dbversion_tiki='1.9';
$host_tiki='localhost';
$user_tiki='myusername';
$pass_tiki='mypassword';
$db_tiki='mydatabase';
?>
```
