Description

It would be nice to allow a user to select an image from a image gallery of the same tiki site when he/she needs to provide an image for a tracker.

Imagine something like "offers" and "demands" trackers, or hand-made articles, etc. You could assign an image from a gallery as image in that tracker item (like article topic in articles feature nowadays), or insert your own image for that tracker item (as in articles nowadays).

Moreover, Tiki could provide a bunch of pre-defined images in such a gallery from Openclipart.com (public domain licensed in there), to make it easier to staart using images in trackers, or article types, etc.....
