Description

This code in db/tiki_1.8to1.9.sql used in upgrade script, is causing duplicate menu items.

```
INSERT IGNORE INTO tiki_menu_options
(menuId,type,name,url,position,section,perm,groupname) VALUES (42,'o','Mobile','tiki-
mobile.php',37,'feature_mobile','','');
```

```
INSERT INTO tiki_menu_options (menuId,type,name,url,position,section,perm,groupname)
VALUES (42,'o','Users map','tiki-gmap_usermap.php',36,'feature_gmap','','');
```

Duplicates also happen for 187, and 188, 900, 1191, 1235, and in a minor way, 189, 780,

See screenshot attached.

Solution

This is handled differently in 3.0 and the problem will no longer happen:

[DatabaseSchemaUpgrade](#)

For old duplicates, you need to delete them manually.
