Description
    I will provide more details later.

    I saw this
    tiki-mobile.php -> link to HAWHAW
    charts -> with use of sameurl plugin
    user_tasks module -> when trying to add a module

    server: Dreamhost, not at root of domain.

    Seems related
    not possible to ADD new task into user tasks in user-task module
