Description

When using the Edit CSS feature (-+tiki-edit_css.php+-) to edit simple.css it tries to import `styles/lite/lite.css` via regexp matching pattern `@import` found in `simple.css`

The problem is i have set PHP memory_limit 128M and it still crashes PHP and in my apache error log i see "Memory exhausted" or "-+[Mon Aug 13 12:45:51 2007] [notice] child pid 2421 exit signal Segmentation fault (11)+-

I did some debugging with dies and i don't get why the following regexp matches twice (there's only one `@import` in `simple.css`):

□□□□□□□□

```
preg_match_all("/@import( |\t)+('|\")(.*)(\\|)( |\t)*;/U", $line, $importfiles, PREG_SET_ORDER)
```
