Description

The "Watch Translation" feature works great however... the email notification that the author receives is the same as a regular wiki page change. It should be different it should:

1. Specify *why* you are receiving the email
...a translated version of a page you are watching was changed...
2. Indicate the change made and which page you should update.
...please review the following change in PAGENAME, sp and update your page PAGENAME, fr...

Or something similar.
