Description

Since some weeks (maybe a couple of months?) file galleries return db error when users logs in tiki. (Using updated 1.10)

Example:

http://uniwiki.ourproject.org/tiki-file_galleries.php

When logging in as user sylvie (or Xavier.dePedro, for instance), I get

```
An error occured in a database query! Context: File tiki-file_galleries.php Url tiki-
file_galleries.php Query: select * from (select u.* , f.`friend` from `users_users` u left join
`tiki_friends` as f on (u.`login` = f.`friend` and f.`user`=?)) order by `login` asc) as tab Values: 0
sylvie Message: Error Message You have an error in your SQL syntax. Check the manual that
corresponds to your MySQL server version for the right syntax to use near 'select u.* , f.`friend`
from `users_users` u left join `tiki_`
```

If you try as anonymous, or as newly created plain registered users (try with user/pass: prova/prova), everything is shown fine.

FYI: friendship is toggled off as feature.
