Description

Module menupage not working for me.

I've assigned the module menupage to registered and anonymous. and added the param

page=>LeftMenu

And this is the page feeding the menupage module:

<http://www.wiki-translation.com/LeftMenu>

BTW, some basic info is missing at <http://doc.tikiwiki.org/Module+menupage>

(or elsewhere at tw.o domains, afaik)

Solution

the parameter should be "pagemenu=LeftMenu"
