Managing XML in TikiWiki for re-use by external apps

Status
❌ Closed

Subject
Managing XML in TikiWiki for re-use by external apps

Version
2.x

Category
- Feature request

Feature
XML RPC
Wiki Syntax (text area, parser, external wiki, etc)
Profile Manager
New feature (not an enhancement to a current one)
Infrastructure
Interaction (with the outside World)

Resolution status
Fixed or Solved

Description
XML files are cool for data interchange.

For example, you can create an xml file to feed a Flash animation. However, you still need to update that XML file via FTP. What if you could edit a wiki page (with permissions, history, etc) and have the Flash animation get the data from it as if it was xml?

Or maybe a button on a wiki page "save to .xml", which would save on the filesystem WikiPageName.xml? (where the Flash would know to look for it)

Related idea:

- Orgchart plugin which works with orgapp
- Generate valid RSS feeds from wiki pages, useful for ad serving and remote management of content, like a site footer

Louis-Philippe Huberdeau ~~will look into~~ used YAML ~~to see if this could be useful~~ and it is very useful for the Profile Manager
