Description

We can now use the login box but it's not very obvious. There should be an icon / button somewhere in tiki-adminusers.php

Just after creating a user or adding to a group would be a good time to Switch User and see what (s)he sees.

As per Tiki23 there is not such option (while we have quickadmin, modules, etc).
This process require thinking.

Actually when you create a user it will be register (no group assigned yet).

If you switch immediatly for this user (a checkbox visible by admin in the create new user screen to switch immediatly for example) you won't be able to do a lot but what can do registered.

Ideally we should be able to create a user, assign a group and switch to this user in one submit...
