I agree, social bookmarking is a very important need in tikiwiki. Please help develop this.

The wiki plugin is now available as a Tiki mod.

The mod is OK, but you still have to do the plugin - if I want ALL wiki pages to have it, I think it would be nice built in so we don't have to patch every upgrade.

Don't make me download something. I want to flip a switch and have it work.
I'll point out ricks99 also created an 'addthis' plugin. As it's a tad hard to notice, it is described at:
http://tikiwiki.org/tiki-view_blog_post.php?blogId=26&postId=305#Better_Bookmarking

You can use the plugins SHARE, SHARETHIS, ADDTHIS in a module so they're visible on every page.
