Description

Listing categories throws a sql error: no such function max(binary). Reason: in category library the function list_categories does a max() of some comparsions. This should be solved in another way.

Solution

Please upgrade to a more recent version of tiki.

For recent/next version: Fix on the way.

this is the error i get with pgsql at tiki-browse_categories.php -> <http://sh.nu/p/550>

Warning: postgres7 error: ERROR: function max(boolean) does not exist HINT: No function matches the given name and argument types. You may need to add explicit type casts.
