Description

A link to remove permissions from structure should be visible when editing permissions for a page that is in a structure.

In version 1.9.8.3, the version that I use, that link don't appears for any page.

I have detected the problem is a programming error in line 14 of file templates/tiki-pagepermissions.tpl.

There is a test of variable \$isStructure when the correct would be to test \$inStructure that is the variable that is assigned in line 89 of file tiki-pagepermissions.php

Solution

The solution is simply change the test in line 14 of file templates/tiki-pagepermissions.tpl.
This works for me.
