Description

CVS update of 1.10 at 04:27 UTC

After the admin user "Admin" enables the poll feature, they are unable to access the poll administration page.

To reproduce:

1. Log in as admin
2. Enable Polls checkbox via the Features-->Admin Page
3. Click on "polls" in left-hand admin menu
4. Permission is refused.

Another way to reproduce

1. Log in as "Admin"
2. Click on "Admin Home" in the left hand menu
3. Click on the "Polls" Icon.
4. User is taken to ~/tiki-admin.php?page=polls, which is not Polls Admin, but Polls comment admin.
5. Click on link at top of page: "To add/remove polls, look for "Polls" under "Admin" on the application menu, or Click Here."
6. URL when hovering is ~/tiki-admin_polls.php
7. Receive permission refused error.

Solution

Fix permissions issue

This is done in trunk (5.0) - lindon
