Description

I tried to upload a 230MB media file to a file gallery, and the site didn't have progress bar, and it sent the request for 25 minutes, then stopped and the file never uploaded.

Marc Laporte adds:

"A progress bar, and maybe a test/check first that file is smaller than what is permitted by server config. In image gallery, tiki tells you who much you can upload. This is needed for file gallery as well."
