Description

Two users received the following error when trying to access a blog for which they have permissions in TW v1.9.8.3:

An error occurred in a database query!

Context:

File tiki-view_blog.php

Url tiki-view_blog.php?blogId=2

Query:

insert into 'tiki_users_score' ('user','event_id','expire') values (?,?/?)

Values:

0 redacted username of blog creator

1 blog_is_read_redacted username of bug victim:2

2 1200929940

Message:

Error Message Duplicate entry 'redacted blog creator-blog_is_read_redacted bug victim' for key 1

No other users (~60) reported this error. The two affected users reported that other blogs were accessible.

When Scoring was turned off, this error did not repeat until Scoring was turned back on.

Solution

See forum post "duplicate key in tiki_sessions - a 'solution'". This error is related to excessively long usernames and string length limits on the event_id variable in the tiki_users_score table, combined with MySQL's truncation without TW's awareness.
