Description

We are documenting some **Use Cases** which will become profiles. To be able to developer/test/improve these profiles, we would need a site like **Open Source CMS** but for all profiles. This site only shows one profile.

These 20+ demo sites would provide admin access to easily test any profile. It would encourage people to generate and improve various profiles as well.

## Comments

**Marc Laporte** 19 Oct 18 13:58 GMT-0000

TRIM can apply profiles: [https://doc.tiki.org/TRIM#make\\_profile](https://doc.tiki.org/TRIM#make_profile)

Now, we need to automate this. Rebuild Tiki from scratch daily and apply these profiles.

And ideally apply some tests so we are alerted when something breaks

**luciash d' being**  22 Oct 18 19:28 GMT-0000

Put it in a daily cron?

```
php console.php d:i --force; php console.php p:a
TheseProfiles; php console.php i:r; php console.php c:c
```
