Description
    I have a set of translations:

    page_id=14 - EN - is an element of a structure "A"
    page_id=15 - DE - is an element of a structure "B"
    page_id=16 - FR - is not an element of any structure

    wiki option "Open page as structure:" is enabled...

    When I try to use reference like this:
    "tiki-index.php?page_id=14&bl"

    the reference works as it would be following:
    "tiki-index.php?page_id=14". (it does not open pages in languages DE & FR)

    When I try to use reference like this:
    "tiki-index.php?page_id=16&bl"
    Everything works excellent!!!

    the same thing with wiki-syntax references.

Is the page 14 has a set of translation?
Each page must be associated to another page in another language individually

nuhets 21 Feb 08 09:17 GMT-0000

The page id=14 is included in a set of translations. If it is also an element of any structure, the option "&bl" does not work.

Otherwise (if it is not an element of a structure but included in a set of translations) everything works correctly
