Description

Similar to [Pass tracker itemID as a parameter to a wiki page, to create a custom-looking tracker rendering](#) but for input fields.

So designers could make the layout in a wiki page (including html) and place the form elements anywhere.

Related:

- [Tracker plugin: useable to edit existing tracker info \(especially user tracker\)](#)

Solution

Done in 1.10 svn

<http://doc.tikiwiki.org/tiki-index.php?page=PluginTracker&structure=Documentation>

<http://doc.tikiwiki.org/tiki-index.php?page=PluginTrackerList&structure=Documentation>

param wiki and tiki

Pretty Tracker
