Description
   I need to see the information about the last modification of files on the File Gallery. Date and User.

   two more columns are needed in tiki-list_file_gallery.php. Last modified, User. I don't know if more mysql field are required.

Solution
   This is already possible since 2.0. You can customize the fields you want to see when creating a filegal or by changing the settings of your gallery in tiki-list_file_gallery.php on "display properties" tab. You can choose to see the fields you need either as a column or in a popup box ...or in both. There are some other fields that you can choose to see....
