Description

Themes using the old preference format do not work/show in 1.10. While we want people to upgrade themes to 1.10, legacy mode should be enabled.

Solution

For now, manually change the Preference syntax: option to "1.9" under Admin...General (tiki-admin.php?page=general)

Under tiki-admin.php?page=look selecting "Use version @:x.xx specified in theme.css or 1.9 if not specified" is not working on my site in the list of forum postings.

- I'm using default2 after a new 2.1 installation.
- Under http://themes.tikiwiki.org/tiki-view_forum_thread.php?comments_parentId=580&topics_sort_mode=lastPost_desc&forumId=4 I described it more detailed.
