On my server, to improve YSLOW score and to get .js and .css files gzipped, I added:

```
AddOutputFilterByType DEFLATE text/css application/x-javascript.
```

If this is common, perhaps it could be added as an example as well.

<http://doc.tikiwiki.org/Payment> is OK

But <http://doc.tikiwiki.org/> redirects to:

<http://doc.tikiwiki.org/tiki-index.php>
