Description
    From tiki-devel

    "I got it - Something must be done before releasing 1.10
    Before in 1.9, there was 2 tables tiki_user_watches and
    tiki_mail_events.
    tiki_mail_events contained the generic notifications and unfortunately
    all trackers/ tracker items watches.
    In 1.10 both tables have been merged into tiki_user_watches - but I did
    not see in the upgrade script something around tiki_mail_events copy to
    tiki_user_watches
    And effectively I lost all my trackres watches
    A volunteer to fix that?"

Solution
    Fixed
