### Description

Hi all!

I am building a tiki in italian, english, german, french and spanish (not published yet).

My development environment:

- XAMPP 2.5 for Windows
- Apache/2.2.8 (Win32) DAV/2 mod\_ssl/2.2.8 OpenSSL/0.9.8g mod\_autoindex\_color PHP/5.2.5
- PHP Version 5.2.5
- DBMS Postgres 8.3.1 (running remotely on an Ubuntu box)

tikiwiki version: 1.9.10.1

I'm having a problem using the i18n feature: if I activate "Multilingual" and I select "Italiano (it)", and then I try to update my homepage, I get the following error message:

---

t1."traId"=t2."traId" and t2."objId"!= t1."objId" and t1."type"=? and t1."objId"=?
```

The same operation, running on a MySql5 based installation, doesn't happen.

Which is my fault ? What another thing I must check and where ?

Thanks in advance !

Giuseppe
