'ext' fields not displayed by name

Status

✖ Closed

Subject

'ext' fields not displayed by name

Version

2.x

Category

- Error

Feature

Contact (address book)

Submitted by

Description

Create a new contact, add an ext field to it, say, 'Work Fax', and set it to something obvious. (ie, 911)

Save record.

When viewing, the name of the field is not displayed, even for the user that entered it.

Solution

Partially fixed: tiki-contacts still needs a ton of work but this at least works on item view.
