Description
Please check this out on other Windows servers, but on my Windows XP WAMP setup, theme information isn't working right. The switch-theme module shows no style being used. Trying to select a theme in the module has no effect. Theme selection works normally with userslib.php CVS version 1.247.2.23, but as of version 1.247.2.24, it's broken. (Comparing the files shows the lines involved. To work with themes I have to be careful about updating userslib.php.)

Solution
No longer a problem. Apparently fixed in userslib.php.
