Description

There is currently no history of changes to categories.

Since permissions can now be restricted by categories, it is more & more important to know when an object is changed from one category to another.

Therefore, we need this info to be logged in tiki-syslog.php and to be added to the watch item feature.

Reminder: categories can be assigned in tiki-admin_categories.php but also when editing a wiki page.

Solution

Watching categories has been added to 1.10

As per Tiki23 it I possible to generate a report for actions on category in the actions log
https://next.tiki.org/tiki-admin_actionlog.php

* category

Created category

Removed category

Updated category

Please test if "Updated category" answer your wish.
