Description

At doc.tw.o (upgraded to 1.10svn April 12th), I went to admin categories.
Selected "Editorial Board Meeting" (already existed), to add pages to it.
At the filter box I set "Editorial Board Meeting" and a mysql error is returned:

An error occurred in a database query! Nothing was added to that category. I had to add them selecting them from the multiple select box showing all pages in doc.tw.o (at least nowadays all pages are listed 😊 - thanks to the coders who improved that)
