Description

If you serch for WhoWhat at the search box on the header of tw.o site (as registered user), or from info.tw.o, you are directed to this url:

<http://tikiwiki.org/tiki-searchindex.php?highlight=WhoWhat&where=pages&search=Go>

which returns nothing:

Found "WhoWhat" in 0 pages

However, the page exists

<http://tikiwiki.org/WhoWhat>

This is kind of frustrating for me, so I guess that for new users also (or even more)...

Solution

Improve search engine a bit more. Offer a bounty somewhere else if within the current members of TW community we can't handle properly the improvements needed to the search feature. I (Xavi) offer to contribute with some money for the bounty.

Still happening in tw.o. Search bar can't find WhoWhat, although search box can find it.

Rip 12 Oct 08 04:10 GMT-0000

I can confirm this bug, I am experiencing this since the upgrade to 2.0/2.1 for any new wiki pages created.

Marc Laporte 20 Oct 09 02:39 GMT-0000

it can't be worse 😊
