Related-to
> - Wiki pages, the description maximum characters displayed in the alert is not correct and the limitation is not applied anyway

Description
> I discovered a problem where one of our users had created a page containing the words SeaMonkey in the description. When she later tried to link to this page with the syntax This is the link text, the link broke, and tried to embed a link to create a new page titled SeaMonkey among other things. The cause of the problem, was that the description of the page she linked to, was inserted as the title of the <a>-tag.

Solution
> Make sure that the description is not parsed as wiki dialect.

This bug has been around for months, in fact.... :-/

drsassafras 26 Feb 20 17:49 GMT-0000

Is this still an issue? If so please update the version information in the ticket.
