Description

Our community needs some forums for the administrators only so that we can pass messages back and forth. However, there's no way to make any of this private. Any registered user can read and post what need to be private forums. In many cases you don't even have to be registered to read.

Solution

Nevermind, it was a stupid user trick. I'm not sure how else to explain it. Apparently "read" doesn't really mean everyone reading to some people. *sigh* Sorry if anyone panicked....
